<http://ogdenian.com/templates/template114/template114.html> \$80
<http://ogdenian.com/templates/template115/template115.html> \$75
<http://ogdenian.com/templates/template116/template116.html> \$75
<http://ogdenian.com/templates/template117/template117.html> \$70
<http://ogdenian.com/templates/template118/template118.html> \$80
<http://ogdenian.com/templates/template119/template119.html> \$100
<http://ogdenian.com/templates/template122/template122.html> \$80
<http://ogdenian.com/templates/template123/template123.html> \$150
<http://ogdenian.com/templates/template125/template125.html> \$80
<http://ogdenian.com/templates/template133/template133.html> \$80
<http://ogdenian.com/templates/template134/template134.html> \$80
<http://ogdenian.com/templates/template136/template136.html> \$80
<http://ogdenian.com/templates/template141/flash-intro-template141.html> \$80
<http://ogdenian.com/templates/template143/flash-intro-template143.html> \$60
<http://ogdenian.com/templates/template144/flash-intro-template144.html> \$75

FLASH HEADERS:

<http://ogdenian.com/flashheaders/flashheader1/flashheader1.html> \$70
<http://ogdenian.com/flashheaders/flashheader2/flashheader2.html> \$60
<http://ogdenian.com/flashheaders/flashheader3/flashheader3.html> \$60
<http://ogdenian.com/flashheaders/flashheader4/flashheader4.html> \$65
<http://ogdenian.com/flashheaders/flashheader5/flashheader5.html> \$60
<http://ogdenian.com/flashheaders/flashheader6/flashheader6.html> \$75
<http://ogdenian.com/flashheaders/flashheader7/flashheader7.html> \$75

IMAGE GALLERIES:

<http://ogdenian.com/templates/template105/template105.html> embedded images in flash file -12 images (294x443 pixels) \$100 I would need is an mp3 if you wanted it changed. I can add more images with an edit of the file - cost depends on number of images.

<http://ogdenian.com/templates/template121/template121.html> \$50 holds 12 images (597x320) pixels, thou one can link galleries 1, 2, 3 etc...I would need is an mp3 if you wanted it changed. With this file you can change the images(external image folder).

<http://ogdenian.com/templates/template124/template124.html>

has all of the images embedded in the flash file, hence the more images the larger the file size. 40 images in that template is pretty much the max. 25 images = 800kb approx. \$100 for 25 images, depends on how many images are involved. requires thumbnails= 84x56 pixels images=600x400 pixels. If more than 25 images are used gallery 1, 2, 3 etc...happens... at the cost of \$20 per additional gallery. I would need a mp3 if you wanted it changed.

<http://ogdenian.com/templates/template127/template127.html> cost \$80 The images that you would upload to your server into a specific folder would have to be all the same dimensions in width and height (450x320) and in another folder the thumbnails that are 90x64 pixels and your mp3 can be embedded as a sound track. I would need is an mp3 if you wanted it changed. With this file you can change the images. **I would need to know how many images are to be used.**

<http://ogdenian.com/templates/template128/template128.html> cost \$80

A flash photo gallery that loads all images and description text from external subfolders and a text file. This means that the flash photo gallery's images and descriptions can be updated by you. Ogdenian can also add your streaming mp3 to the flash photo gallery. The images that you would upload to your server into a

specific folder would have to be all the same dimensions in width and height (363x271). This is a horizontal photo gallery.

<http://ogdenian.com/templates/template129/template129.html> cost \$80 A flash image gallery that loads all images and description text from external subfolders and a text file. the logo is also grabbed externally. Ogdenian can also add your streaming mp3 to the flash photo gallery. The images that you would upload to your server into a specific folder would have to be all the same dimensions in width and height (250x375). This is a vertical image gallery.

<http://ogdenian.com/templates/template131/template131.html> cost \$80 A flash photo gallery that loads all images and description text from external subfolders and a text file. It also has a slideshow feature and a separate flash music file. Ogdenian can update the file to add your own streaming mp3 to the flash photo gallery. The images that you would upload to your server into a specific folder would have to be all the same dimensions in width and height (450x320), though ogdenian can edit the file for a different size image and different color background and text.

<http://ogdenian.com/templates/template132/template132.html> cost \$80 A flash image gallery that loads all photo images from an external subfolder and has file properties loaded from a text file. It also has a separate flash music file. Ogdenian can update the file to add your own streaming mp3 to the flash photo gallery. The photo images that you would upload to your server into a specific folder would have to be all the same dimensions in width and height (550x366), though ogdenian can edit the file for a different size image. The flash file makes the thumbnails automatically.

<http://ogdenian.com/templates/template139/flash-site-template139.html> base cost \$300 A flash photo image gallery that loads all photo images, file properties, menu, and text loaded from external files. It also plays an external mp3 music file. The photo images that you would upload to your server into a specific folder would have to be all the same dimensions in height (450px).

I would need to know:

- the menu structure
- site name (to replace ogdenian.com)
- branding statement or word (to replace photography or not)
- supply an mp3 to replace music
- how many galleries? (names of galleries)
- how many images to start

Afterwards you could exchange images, add/remove galleries, modify text via hex coded (not complicated) PHP files edited in notepad, and change out the mp3 at will. Also the colors can be modified(right now there is a pastel blue to pastel orange going on the admin file edits via RGB codes in notepad.

<http://ogdenian.com/templates/template140/template140.html> cost \$90 A flash image gallery that loads all photo images from an external subfolder and has file properties loaded from a text file. Ogdenian can update the file to play an mp3 from the server. The photo images that you would upload to your server into a specific folder would have to be all the same dimensions in width and height (600x600), though ogdenian can edit the file for a different size image. The flash file makes the thumbnails automatically.

Video FLV (Flash Video) GALLERY:

<http://ogdenian.com/templates/template138/template138.html> cost: \$75. This is a flash FLV Video Player Module that loads all the flash videos from an external subfolder. The FLV Videos uploaded to your server into a specific folder would have to be all the same dimensions in width and height (320x240), though Ogdenian can customize the file for different size videos and quantity thereof. Also, the flash file loads the jpg thumbnails automatically from an external folder (75x57.)

<http://ogdenian.com/templates/template145/template145.html> cost: \$50. If you click the image to the right you will see a flash FLV Video Player Module that loads a flash video (FLV) from an external subfolder on the server. The video dimensions in width and height is 320x240, though ogdenian can customize the file for different size videos. The player knows what FLV to play based on a line of code in the source of the html file and this file is server specific. A line of code in the html file ("VideoFile=1.flv") can be exchanged with a

dynamic asp or php script so that it calls up whatever video FLV a query passes to it or you can just use it over and over again as a singular script.

Notes:

These prices may vary depending on how much editing is required (i.e. images, sounds, pages, menu items, etc...) Minor editing is of no consequence. I also do custom flash files.

USER TERMS & CONDITIONS AGREEMENT

Upon purchase of any template, intro or site design files, the purchaser is granted a single (1) End User License for the production of a single (1) web site from the custom template purchased.

A web site produced from the template is deemed to be:

- (a) Hosted online at a single (1) unique URL. and / or
- (b) Used as a desktop presentation from a single personal computer or accessible by a local area network from the same personal computer.
- (c) The web site's content can be changed and updated at will by the purchaser or the purchaser acting on behalf of the purchaser's assigned single end user.

Changes and updates to the web site are to be implemented in accordance with the correct use and operation of the template. The template is to be used in accordance with the terms and conditions contain herein. Any use of the template for any other purpose, without prior written agreement with Ogdenian.com shall be deemed a breach of these user terms and conditions. Any music or images found in the template must be replaced with the buyer's images, text and music. The buyer takes on all copyright responsibility for the contents of the template as shown on their site. No support will be given for any purchased template if the template was not edited by ogdenian.com. Ogdenian.com right to protect it's interests and the interests of it's license holders by seeking settlement of any license breach by enactment of lawful actions.

Purposes of use considered a breach of terms and conditions include but are not limited by:

- (a) Offering the physical use, both freely and under commercial arrangement of any template to other persons and / or organizations.
- (b) Distribution by any medium or conditions of the any template.
- (c) Display by any medium or conditions of the any template, website built from templates, or screenshot of templates/websites.

In purchasing any template it is understood that you accept the USER TERMS & CONDITIONS AGREEMENT.
